My apologies to all. I emailed Joe first but since I received an out-of-office reply, I thought I would try my luck with Weston to see if I could get some answers sooner to move faster on this as I approach my deadline. Thought they would be able to provide me with the specifics as to what exactly was tested (what reports correspond to soil testes vs. certain vessels, etc.) and to help me interpret some of those results.

If you need specific questions I can send those, but it's always easier to talk on the phone so that I can clarify what I'm asking and also ask follow-ups. Please let me know when you guys are available. Thanks so much.

Best,

Ms. Mosqueda:

Weston Solutions is a contractor for the EPA and is not allowed under our contract to respond to media inquiries associated with EPA projects. The EPA media contact is Joseph Hubbard. The information you have was provided by me to Mr. Hubbard who provided it to you. Your inquiries should be directed to Mr. Hubbard. You can also cc me on your requests so that I may be able to try to address your questions through Mr. Hubbard.

Thank you for your understanding.

Gary Moore
